D6 – Presentation Slides

Boréal Marché – Customer Intelligence Platform
Hossam Siyam – 420-977-VA – September 2026

Slide 1 – Title

Boréal Marché – Customer Intelligence Platform

An end-to-end AI system: from raw transactions to a monitored, deployed, governed platform.

- **Student:** Hossam Siyam
- **Course:** 420-977-VA – AI Development Project
- **Live API:** https://capstone-bkg2.onrender.com
- **Live Dashboard:** https://bibe6vpgewedpjfv7emsae.streamlit.app

---

Slide 2 – The Problem

Boréal Marché: A mid-size Quebec online grocery

Problem	Current Approach	Consequence
Retention	15% coupon to every customer every quarter	Wastes margin, misses churning customers
Cross-sell	Hard-coded recommendations, 8 months stale	Missed attachment opportunities
Customer support	Two employees answer 40 questions/day in 2 languages	Repetitive work, slow response

---

Slide 3 – The Solution

One platform, three model heads

Head	Technique	Business Question
A – Prédiction	Supervised classification	Will this customer buy again in 90 days?
B – Recommandation	Association rule mining	Given the basket, what should we suggest?
C – Assistant	RAG + tool calling	Answer customers in French or English

---

Slide 4 – Architecture

Offline (scheduled) and Online (per request)
